

RISHABH MALHOTRA

Software Developer

78148-37076 | rishabh124m@gmail.com | github.com/rishi-rm/

PROFILE

Full-stack developer skilled in React, Node.js, Express.js, MongoDB, and API-driven systems, with hands-on experience building production-ready business applications, inventory management systems, video streaming platforms, and AI-powered tools. Experienced in leveraging AI tools such as Claude and GitHub Copilot to accelerate development. Strong foundation in DSA, OOP, and clean architecture.

PROJECTS

Inventory Management System | React, Node.js, Express.js, MongoDB, TailwindCSS (2026)

- Developed a full-stack inventory management platform used by local businesses to manage raw materials, products, stock levels, and inventory valuation.
- Built secure REST APIs with PIN-based access control, automated GST/freight cost calculations, and inventory validation.
- Implemented manufacturing workflows that automatically deduct raw materials and maintain stock consistency.
- Created analytics dashboards for inventory value, stock metrics, low-stock alerts, and operational reporting.

YouTube Transcript Extractor + AI Summarizer | React, Node.js, Express, HuggingFace API (2025)

- Built a transcript retrieval and AI summarization platform with translation support and chunked text processing.
- Designed REST endpoints for transcript extraction and summarization while handling large-text workflows and API limits.
- Improved backend reliability using asynchronous pipelines and robust fallback logic.

FlixTerra – Movie Streaming Web App | React, TailwindCSS, Node.js, Express (2025)

- Developed a full-stack movie platform with search, filtering, dynamic routing, and detailed movie pages.
- Implemented HTTP range-based video streaming for smooth playback and seeking.
- Added favorites management and reusable component architecture.

EXPERIENCE

Winter Internship

- Refactored backend email workflows by replacing SendGrid with Nodemailer across OTP, password reset, and notification systems.
- Worked with Express, MongoDB, JWT authentication, and role-based access systems.
- Tested REST APIs using Postman and improved backend code quality while maintaining existing APIs.

EDUCATION

Chandigarh University — Bachelor of Computer Applications (2023–Present)

SKILLS

Languages: JavaScript, C++

Frontend: React.js, TailwindCSS, React Router

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman, Vercel, Render, Ngrok, Claude, GitHub Copilot

Core CS: DSA, OOP, DBMS
